## The Passing Parade

By HAROLD S. MAY

Politics is in the air. And some have said that this is an off political year. With the number seeking the various offices to be filled, we believe that we will have a most interesting and highly spirited campaign by a group of well qualified candidates. It will be interesting to watch the races as they unfold.

The rash of break-ins we have been having over the area lately, which included The Herald, reminds us of the case that took place in Los Angeles lately. A man appeared at the locked front door of a store, knocked on the glass and was told by the owner to "come back at 9:30 — opening time." The man came back as instructed, produced a .45 caliber automatic, robbed the proprietor of \$706 and a loaf of bread.

An old-timer is a fellow who can list as his youthful ambition the desire to be an engineer of a steam locomotive.

Everybody likes to feel important now and then. To help this along, every husband and every wife should make a contribution to their feelings by telling the other how wonderful each is. This should be done at least once a week.

On the basis of increased pay alone, it will require the average steelworker about 7 1/2 years to make up the \$2,000 he lost in wages during the 116-day steel strike. These figures are based on a 40-hour week, 52-week year, and increases of seven cents an hour effective Dec. 1, 1960 and Oct. 1, 1961. The loss to the steel industry is not available nor is the cost to the American people being estimated. It seems that only Dickie Nixon was the winner.

The fellow who is at the end of his wits—has been making short journeys.

Statistics show that prices have been going up for nearly two and a half centuries. But there's a catch to this statement. While it took 200 years for prices to double—up to a quarter of a century ago—they have doubled again in the past 25 years.

A friend of ours, when discussing the investigation into the high cost of the new drugs, said: "I thought that when you said there was a 100% mark-up that that was all the percentage there was."

How many times, when it's time to dress for an outing, you ask the good wife whether you should shave or not. What happens? You always shave.

The story is told of a Texas rancher who had some boots made and they turned out to be too small. It was suggested that he have them stretched. "Not on your life," he bellowed. "These boots are gonna stay this way. Every morning when I get out of bed to corral some cows that busted out during the night and then have to mend the fences, then, as I watch my ranch blow away in the dust; and after supper when I listen to the radio and hear the low price of beef quoted and all the time my wife is nagging me to move to town, I feel mighty low. But, when I get ready for bed and pull off these tight boots—well, that's the only pleasure I get all day."

Possibly the hardest decision some have to make is between right and wrong even though every sane person knows the difference at first sight.

## Study Being Made Of New Rogersville School Building

All Students Comfortably Housed Following Fire Of Last Wednesday

Due to the illness of a member of the Lauderdale County Board of Education, the meeting of that body scheduled for Saturday has been necessarily postponed. However, a study of the situation at Rogersville created by the complete destruction of the elementary school by fire last Wednesday is being made.

The Board of Education's architects, Northington, Smith and Kranert are studying the possible relocation of the building to better fit into the master plan that was set up some years ago. However, no recommendation has been made and careful study by the board and Superintendent Allen Thornton will be given to this report.

It has been stated by officials of the county school system that the new building that will replace the eight classroom structure that was destroyed, will be a great improvement over that building. The latest type of construction looking toward long years of adequate service will go into the planning, it was said.

The slightly more than 200 students, who were deprived of their classrooms, are now comfortably housed in the newly completed vocational ag. building at Lauderdale County High School with additional classrooms set up in band room, guidance room and physical education rooms, Superintendent Thornton said.

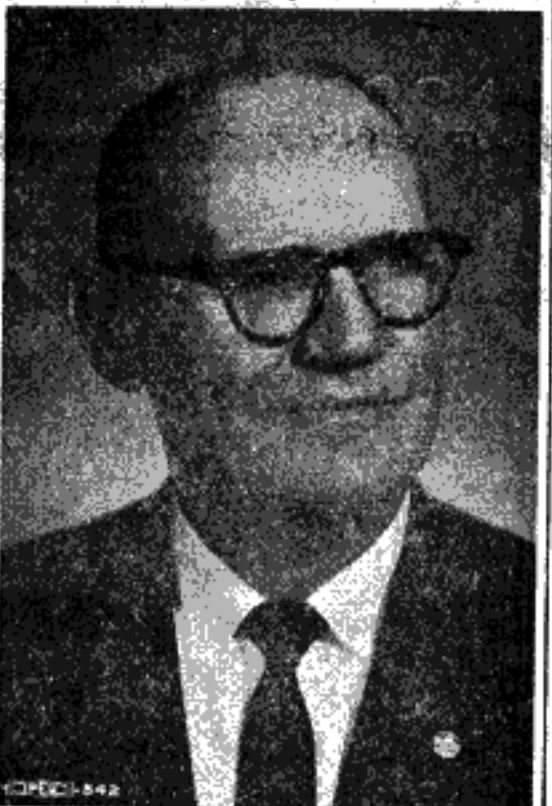

It was noted that the mild flu epidemic in the county resulting in considerable absenteeism in the schools has caused much concern.

Mr. Thornton said that \$52,000 insurance was paid on the elementary school building with \$14,000 on the contents. It is estimated that it will require \$150,000 to replace the building with some \$25,000 for the contents. "The problem of financing this new building is a serious problem with the board," Mr. Thornton said.

## Fifteen Fatalities In County In 1959

Dept. Of Public Safety Director Warns Public To Drive With Care

During the past year at least 28 of the 595 people who died in rural traffic accidents in the State of Alabama died in the three counties that make up the Florence Post.

A further breakdown of the rural highway fatalities in the three county area shows that Colbert had 3, Franklin 10 and Lauderdale 15.

As we take a look at the causes of rural accidents during the last month of 1959 we find the same violations that we had had throughout the year; namely:

1. Speed too fast for conditions.
2. Driving on wrong side of road.
3. Failure to yield right of way.
4. Following too closely.

## Pickets Placed At Number Jobs Cause Shut-down

**BULLETIN**  
A meeting of the Iron Workers Local 477 and North Alabama Contractors with a representative of the Federal Mediation and Conciliation Service, has been scheduled for today at 4 p.m. at the Hotel Muscle Shoals. It was stated that since other unions also must sign new contracts with the Contractors Association they too could attend the meeting.

A complete shutdown idling some 500 workers of the Daniels Construction Company engaged in working on the new hot line at Reynolds Metals Company, began Monday at 7 a.m., when pickets were placed there by Iron Workers Local 477.

The Iron Workers Local 477 has jurisdiction over a large part of the North Alabama area including the Tri-Cities, Decatur and Huntsville, it was stated, and while there is no word of picketing elsewhere it was feared the walkout would effect construction in virtually all the Muscle Shoals region. Other shutdowns in the area include, besides the Reynolds Metals project, the First National Bank, the Chamber of Commerce building, and Union Carbide Metals.

Management is represented by North Alabama Contractors Association which it was stated has negotiated for the past several months with the Iron Workers local in an effort to iron out differences and agree on a new contract. The previous two-year contract expired December 31, it was reported by W. F. (Bill) Baker, secretary of the North Alabama Contractors Association. It was said that contracts have not been signed with other crafts either, two of these being the carpenters and cement workers unions.

The last meeting with the Iron Workers Local 477 was held on Friday, it was reported, at which time a Federal mediator was present. The strike followed on Monday morning. The Daniels Construction Company work at Reynolds coming to a complete halt. The strike not only idled the iron workers involved directly but boiler-makers, pipe-fitters, sheet metal workers, cement finishers and teamsters at Reynolds. Listerhill plant.

The Iron Workers local is asking for a straight 25-cents an hour across the board, it was stated. There are said to be no other conditions involved such as health or welfare benefits. E. F. Madison is project manager for Daniels, and Nolan Hatcher is president of the North Alabama contractors Association. John A. Pace is business manager for the Iron Workers union.

Wage rates for the iron workers are \$3.42 1/2 per hour at present, it was reported.

## Getting Our Money's Worth

There will be an investigation into the nation's super highway building program according to Robert E. (Bob) Jones, who is a member of the committee charged with this task. According to Jones, it will be one of the biggest jobs in this session of Congress.

The job of the committee will be to see to it that the people will "get every mile of road they are taxed for." The Congress urged this investigation to prevent waste of money, bad planning and management of the roads program. The roads program is the biggest single peace time project in the history of the world. It is to put modern, super highways stretching for 41,000 miles, criss-crossing the country. Known as the National System of Inter-state and Defense Highways, they promise much, Mr. Jones points out.

Our traffic mess today must be solved. For years, crowded streets have wrecked the business of many cities and towns. It kills about 35,000 persons a year. It injures hundreds of thousands. Many starts and stops waste gasoline and cause wear and tear on our vehicles. Property values are brought down by traffic handled poorly.

Our traffic mess today is very wasteful. A late figure reports that this waste is over \$7 billion a year. This figure includes hospital bills, doctors' fees, waste of fuel and equipment and high insurance costs for cars and trucks.

The modern superhighway can help our traffic problems. Where such highways are in operation, the picture is much better. Deaths are cut in half and accidents one-third. Even wear and tear on brakes and tires is cut, besides gas and oil costs.

The people who drive cars—and that means over 90 percent of us—are paying taxes to build this national system of modern highways. Already they have paid over \$1 billion at the gas pumps and in the garages.

With Congress alert to the people's interest we should get our money's worth.

## Our Tourists Are Important

Did you know that tourists in Alabama during 1958 contributed \$536,000 toward education in the state? It is true. For the fiscal year ending Sept. 30, 1958 the state's 3 per cent lodging tax brought in the above amount, nearly \$10,000 more than the previous year.

Alabama is receiving increasing national recognition as a tourist state. It offers one of the most beautiful and interesting vacationlands in the entire South. The great TVA lakes and dams at the gateway of the state in the north to Mobile on the gulf, now attract tourists from every state in the union. The state is a fisherman's paradise.

So let us Alabamians constitute a welcoming committee to see to it that the tourist to our state gets an eyeful of the many advantages we have to offer and leaves with an impression that the people really are hospitable and ready to welcome him back at any time.

The average tourist is intelligent, kindly disposed and of good will. He wants to know Alabama or he wouldn't visit the state. So let's take him to our hearts and make his visit pleasant and profitable. Give him full value for the money he spends with our motels and hotels, service stations, our cafes and restaurants, and our stores.

There's another thing, too, about our Average Tourist. When he is well treated and is made to feel his visit to the state was worthwhile, he is going to talk about that visit. He is going to tell the folks back at home about his sight-seeing tour. The better we treat him while he is here, as our guest in Alabama, the deeper and longer the red carpet we roll out for him, the more enthusiastic he will be about our state, our people and our sights—he'll become a sort of missionary and preach the gospel of Alabama and her kindly people.

In a recent radio address Senator Sparkman said: "In 1957, Alabama's tourist business brought about \$100 million into the state. In 1958, the income from tourists increased to about \$110 million, more than the total income from any single category of agricultural products."

"In 1958, Alabama's cotton crop brought about \$78 million to the state—\$32 million less than the tourist trade. This seems to lend some truth to the old adage, 'a tourist is worth more than a bale of cotton and is a whole lot easier to pick.'"

"Tourist profits are widely distributed. The average tourist dollar changes hands 26 times before it leaves a given area. From this dollar about 29c is spent on food, 21.5c on lodging, 23.5c on transportation, 14c on retail purchases, 8c on entertainment and 4c on services."

Let us appreciate our tourists and they will appreciate Alabama.

### Negro Youth Faces Chair

Joe Henry Johnson, 17-year-old Negro youth who entered a plea of guilty in the slaying of Miss Dicie Boyd, 62, last Nov. 1 at her farm located on the Lauderdale-Limestone county line, faces death by electrocution. An all-white jury reached this decision in Athens Friday afternoon, after two hours of deliberating. Execution date was set for April 22 by Circuit Judge Newton B. Powell.

### Airliner Crash Kills 37

A Colombian airliner, on a flight south from New York, turned over on its back, exploded and caught fire in landing at Montego Bay, Jamaica, last Thursday morning, killing 37 persons. Nine, including four passengers and five crewmen, survived, but all the 17 Americans aboard perished. The Super-Constellation, 10 hours behind time, had to lay over in Miami for repairs to a faltering engine. Hendrick C. Wytzes, one of the survivors, said, "We touched down very rough. My impression was the landing gear gave way. We groundlooped, turned over on our back and caught fire immediately."

### Monkey Safe After Rocket Trip

A six-pound monkey, named "Miss Sam," was shot aloft 9 1/2 miles from the test center at Wallops Island, Va., last Thursday and was then eased into the ocean in a one-ton capsule similar to the one that will carry a human into orbit next year. Recovered by a Marine helicopter, Miss Sam emerged safe and frisky. The 3-year-old monkey was immediately flown to her home, the School of Aviation Medicine at Brooks Air Force Base in San Antonio, Texas, for more examinations and tests.

### Engines May Have Stalled

It has been discovered by investigators that two engines were feathered on the Capital Airlines Viscount that crashed near Holdcroft, Va., last week. A source disclosed that the airliner's number one and two engines were feathered at the moment of impact. "Feathered" is a safety maneuver used in case of engine trouble and involves turning the propeller blades so that only the thinnest edges are exposed to cut down on "drag" which permits a pilot to maintain speed with his remaining engines. Although Civil Aeronautics Board investigators would not comment on their findings, stalling is evidenced.

### Symington Hits Race Relations

According to Missouri Sen. Stuart Symington, who flew to Montgomery for a speech before the Alabama Chamber of Commerce Monday night, America's segregation problem has made bitter enemies for the U. S. in Africa, the Far East and other parts of the world. In an interview at Montgomery Airport, Sen. Symington said, "There are two billion colored people in the world and one billion white people. The race problem in the U. S. is being exaggerated by the Communists and has made bitter enemies for America."

tial and continuous improvement in the high standard of professional training of the teaching personnel, the physical plants of the school have been improved, added to and many new buildings constructed. The recognition given the school system for these vast improvements have increased over the years and come from the Department of Education and various professional organizations.

Among the physical improvements made are complete new school buildings, numerous libraries, new facilities for physical education including new athletic fields, science laboratories, lunchrooms, new heating installations, and other structures.

The improvement in the instructional field is reflected in the fact that Lauderdale County is one of two out of 67 rural school systems in the state which has all its white high schools meet accreditation standards of the state and Southern Association of Secondary Schools and Colleges. The two Negro high schools, in addition to all the other improvements in the school system under Mr. Thornton's direction is the splendid transportation facilities serving the students. Each year, a goodly number of new buses have been added with the oldest buses being retired from service. This has made it possible to have a safe and economically operated transportation service.

A. A. WILLIAMS

"A. A. Williams, the oldest member of the local bar, is a man recognized for his integrity by his fellow lawyers. Throughout his long years of practice it can be truthfully said that he never took unfair advantage of anyone," is the opinion expressed by a fellow attorney.

Recognized for his ability in civil practice, Mr. Williams has been active in this field longer than any other practicing attorney in this city. He is admired by both client and opponent and is looked to for advice by young lawyers.

Allison Andrew Williams was born February 1, 1876, at Anderson's Creek, Lauderdale County, the son of S. M. and Rebecca Smith Williams. The elder Mr. Williams was a merchant and mill worker.

The family moved to Lexington, where Mr. Williams entered elementary school. He was a student at Greenhill school and later attended State Normal College.

## Late News

President Eisenhower Tuesday nominated former Arkansas Congressman Brooks Hays for a full nine-year term as a member of the TVA Board of Directors. Hays had been acting director in the place of Dr. Frank J. Welch who had returned to his post as dean of agriculture at the University of Kentucky.

The threat of a further break grew hourly Wednesday as the friction increased between the French Government of Charles de Gaulle and Algeria. De Gaulle threatened to invoke powers of dictatorship granted him under the Constitution if his government should fail to back his policies. He is already faced with a number of resignations following his dismissal of high military officials in inflamed Algeria.

President Eisenhower Tuesday laid down a policy of no intervention and no reprisals at this time against Cuba, despite what he called Communist intrigues and unwarranted attacks on the U.S. by Fidel Castro. The President drew a distinct line between the Cuban prime minister and the Cuban people and left the way open for a tougher stand and specific action later, if he sees a need for such action.

An agreement made Tuesday between TCI with the Brotherhood of Locomotive Firemen and Enginemen, which ended six straight days of bargaining, averted the threat of another mass work stoppage at TCI, clearing up TCI's labor picture for the first time since mid-July. This joint statement was issued by TCI President Arthur V. Wiebel and M. A. Rose, Vice-President of the BLEE. The Brotherhood's 219 workers at TCI were scheduled to walk off their jobs at midnight Monday if a settlement had not been reached.

The Senate Tuesday approved the appointment of Defense Secretary Thomas S. Gates, Jr., who has come under Democratic fire for his estimates of Russian missile strength. Only two Senators were present when the action was taken, Democratic Leader Lyndon B. Johnson, who read Gates' name from a long list of nominations and Republican Leader Everett M. Dirksen, who listened. Approval was automatic when there were no objections. Gates has been serving under recess appointment since Neil H. McElroy resigned from the post late last year.

## THE SPILLWAY

IF YOU DON'T like your cakes and pies (Not even after sixty tries) . . . Be guided by the newly-wed  
Whose hubby always looks well fed . . .

"FOLLOW THE FAT MAN . . ." That's what we've been told when looking for a good eating place . . . And now we give the same sort of sage advice to those of you who have trouble making your soufflé (if you know what we mean).

"FOLLOW THE YOUNG MARRIEDS" who've recently enrolled in "Cooking School" . . . say we. Included "mongst those attending Monday morning classes are Connie McIntosh and Alice Smith and Barbara Wright . . . Bay Linstrom and Eloise Heslington and Betty Martin . . . Margaret Brown is the capable teacher and her home on North Wood is the School House . . . We hope to be among those present at the next session (the third) and we'll be looking for YOU.

A DIFFERENT SORT of school . . . but one which is equally interesting . . . is being attended by Martha Gilbert and Cara and (Doctor) Bill Slaton . . . all pupils of Marie Thomas . . . French war bride of the 1918 World Unpleasantness . . . and since that time a charming addition to our sister city of Sheffield . . . "Ouis" and "tres biens" punctuate the Southern drawl of these three and numerous other localities who've been Marie's pupils at scattered intervals (Bess Meade . . . members of the Rogers family) . . . adding conversational interest to social gatherings in the ole home town . . . et cet . . .

MEMO TO BOOK LOVERS . . . Chock full of charm is an autobiography which has come our way in recent days . . . Under the title "A Letter To My Daughter" . . . Robert Parke Alexander (retired Comptroller of the Pure Milk Company of Chicago) has set down in three volumes of two hundred and fifty pages each the appealing and delightful incidents of his life . . . Beginning with his early forebears in their native Scotland . . . the author mingles history with anecdotes . . . family pictures with jokes . . . as he unfolds everyday events in fashion as smooth as fiction . . . Proud possessor of the priceless gift is (naturally) the DAUGHTER of the title . . . Virginia Alexander Curtis of 525 Richard Street, Florence.

A PLEASANT BUZZ of anticipation centered around the home of Leta and Earl Haddock during the past weekend . . . as plans were made for the last-Sunday christening in Central Heights Methodist Church of their recently-arrived granddaughter . . . Kelley Marieta Montgomery . . . whose parents are Martha (Haddock) and Fred Montgomery . . . and whose name (Marieta) is a mother-and-grandmother combination . . . Of sentimental interest were the tiny gold baby rings (once worn by her mother and her "aunt Patsy" Woller) which decorated the center of a satin rosette tucked into the folds of her christening robe . . . The Wollers (Patsy and John and "little John") arrived from Auburn for the occasion and (the Reverend) Martin Gunnin (and his wife . . . Minnie)

## Finney Is Captain Quarterback Club

Coach Paul Dietzel Is Guest Speaker At Final Meeting Of Season

Charles T. Finney, well-known Florence sports enthusiast, was named captain of the Tri-Cities Quarterback Club at their annual meeting at the Tennessee Valley Country Club, Tusculum, Tuesday night. Mr. Finney had served as alternate captain during the past year.

Elected to serve with Mr. Finney are Howell Heflin, Tusculum, alternate captain; Sam Carter, Sheffield, quarterback and the following members of the team (board of directors): Dr. S. S. Norvell and William L. Young, Florence; Julian Olim and Faye Mills, Sheffield.

Coach Paul Dietzel of Louisiana State University, mentor of the national champion football team of 1958 and named Coach of the Year for his great work with the Tigers, was the delightful speaker of this occasion.

Coach Dietzel, one of the nation's top coaches at age 37, delivered an address that was filled with humor, information and sound philosophy, one that every young boy should hear and one that gave a new insight to the handling of young athletes.

Stressing the need for loyalty in everyday living—the loyalty of an employee to his employer, the loyalty of assistant coaches to the head coach, the loyalty of every person to his every endeavor, Coach Dietzel presented a picture of prime requisite today for the success of his undertaking.

It was the consensus of those present, which was the largest attendance at any Quarterback Club meeting, that the address of the fine LSU coach was the top program in the long history of the local organization.

## Davis Succeeds Duran As Cancer Society Treasurer

P. O. Davis of Auburn, a director of the American Cancer Society, Alabama Division, Inc., for many years, has been elected treasurer succeeding the late Fred A. Duran of Auburn.

This announcement was made by Dr. W. D. Anderson of Tuscaloosa, state division president. Duran passed away Jan. 9 after an illness of several weeks. He has served as state treasurer for many years and was in his fourth term as a director of the national society.

Davis, retired director of the Extension Service of Alabama Polytechnic Institute, holds a long record of public service in the fields of education and agriculture.

Born in Limestone County, he attended Alabama Polytechnic Institute. Even before graduating from high school he taught in the schools of Lauderdale and Limestone Counties. He worked with the Southern Railway one year and The Progressive Farmer one year.

The remainder of his career was with A.P.I. now Auburn University.

Davis was extension editor and director of publicity, experiment state horticulturist; executive secretary, registrar and director of public information, and finally director of extension.

### Dr. Blake Tells Of European Travels

Dr. W. H. Blake, of Sheffield, was the interesting speaker before the Florence Exchange Club at Hotel Reeder Tuesday noon when he gave an account of his recent travels in Europe, especially in Russia, with members of the College of Surgeons of which he has long been a distinguished member.

The Rev. John Ebaugh had charge of program arrangements and presented the speaker.

The seven weeks trip, Dr. Blake said, took them through the principal cities of Western Europe and the Scandinavian countries where they were privileged to visit colleges and hospitals and observe the progress of surgery in that part of the world. He was high in his praise of what these countries had to offer. He also gave interesting insights of points of interest in these countries.

Of special interest was his recounting of his observations in Russia and especially the detailed picture of the educational system that the Russian government has instituted since the Communists took over and is carrying out today. This gave a clearer understanding of the scientific progress being made and the reason why Russia has come out of the dark in the past several years.

On this trip, Dr. Blake was paired with Dr. Ross McIntyre, who served Franklin D. Roosevelt as his personal physician while in office. Dr. McIntyre has since died.

Dr. Blake and his party were in Russia when Ed Sullivan was there with his show some weeks ago and they were guests at one of his shows.

Later, the party visited Vienna and Paris where they studied the additional advances in surgery practiced in these cities.

"A FAMILY THAT WORSHIPS TOGETHER — STAYS TOGETHER"

These hands might have painted the world's greatest masterpiece. These hands might have played faultlessly the most difficult concerto. These hands might have mixed a compound that would destroy disease. These hands might have been raised in blessing over a trusting mankind.

Instead they are chained. Somewhere, somehow, they failed. Perhaps they reached over a counter and stealthily snatched a jewel. Perhaps they searched a safe and took what other hands had worked for. Perhaps they held the gun that wiped out a life. Somewhere they went wrong. Somewhere they failed.

Hands do not act by themselves. Personalities control them—personalities swayed by impulses and convictions, good and bad. The Church, your Church, is waiting to guide hands, minds, hearts and lives. Here good impulses, right convictions are born and nurtured. Here, in God's House, hands learn to move aright to find life's work, unchained and triumphant.

## THE CHURCH FOR ALL

ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

## AUDITOR'S COMMENTS

## I. OPERATIONS

The operations of the City of Florence, Alabama for the year ended September 30, 1959 resulted in a net surplus in the aggregate amount of \$182,169.49, all funds consolidated. Details of this result are to be found in the statements of revenue and expenses applicable to the various funds, which may be found by reference to the index with this report. The statements of revenue and expenses do not reflect any provisions for accrued interest receivable on public improvement assessments.

The City's principal sources of revenue consists of ad valorem taxes assessed against real and personal properties, privilege licenses, police court fines, parking meter collections, gasoline tax, and certain contributions from the State of Alabama. A gross receipts tax is collected for the benefit of the School Board and the retirement of school warrants. The entire two cent cigarette tax is pledged to the payment of principal and interest of hospital annex warrants in total amount of \$300,000.00 outstanding at September 30, 1959. Taxes on real estate and personal property are assessed by the Lauderdale County Tax Assessor. A levy of 15 mills is made, segregated as follows:

General Fund	5 mills
City Schools	5 mills
1957 School Fund	5 mills
Total	15 mills

License fees, police court fines, and parking meter collections are for the benefit of the General Fund and are used for the operating expenses of the City.

Gasoline taxes are collected on gasoline handled in the Corporate Limits and police jurisdiction of the City, and are pledged to the payment of interest on refunding bonds and the retirement thereof, and to the principal and interest of street resurfacing warrants, payable \$25,000 per annum. However, the Refunding Bondholders Fund already has more than sufficient assets to cover the retirement of said refunding bonds, and the gasoline taxes are being used for other purposes.

## Telephone Talk

by  
**FORREST W. BRICE**  
Your Telephone Manager

HOW MANY OF YOU FOLKS got extension phones for Christmas? Are you enjoying them? I should think you're wondering by now how you ever got along without one. Perhaps yours is in the bedroom where you spend about a third of your life. Or the kitchen where you're cooking, the den where you're enjoying the family while the children study their lessons. Wherever it is, it's probably just a lazy reach away. I'm hoping you'll like it so much you'll want another real soon. Whenever you have to think up something different for a present, just remember how much an extension phone will please.

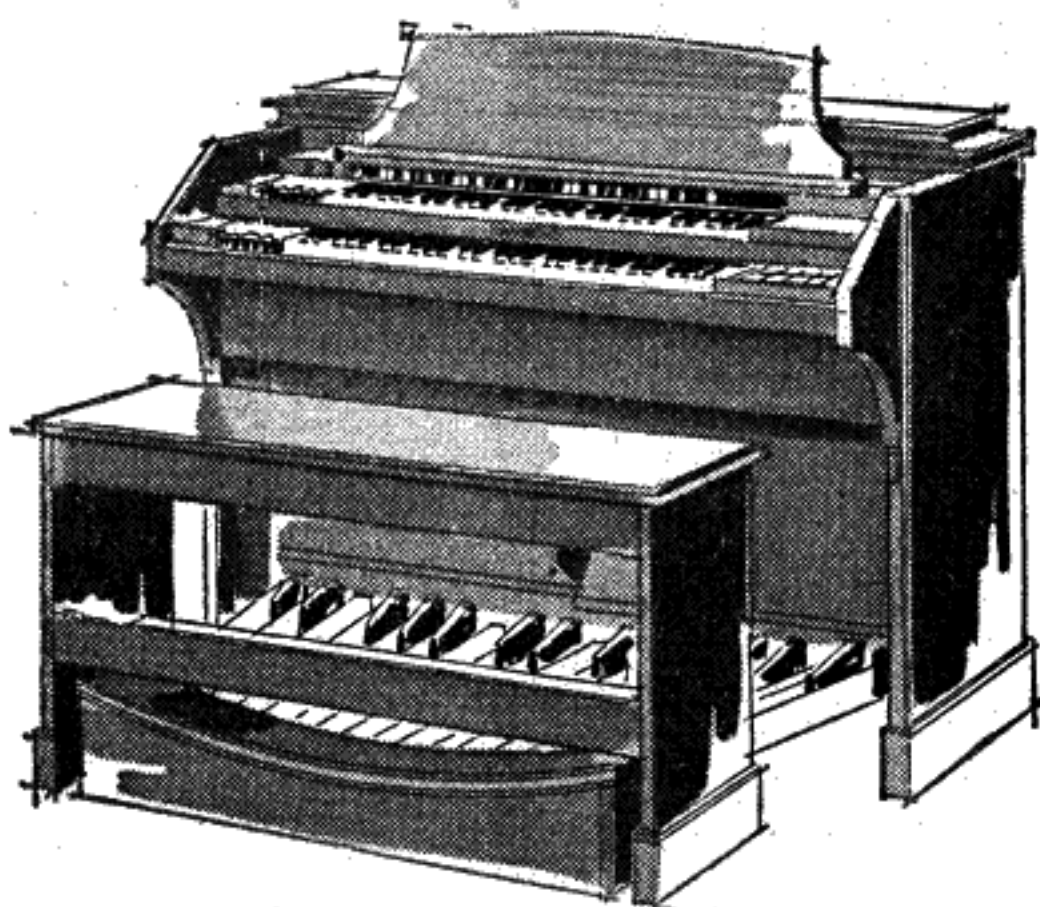

"How does it feel to be a retired operator?"

MOST FOLKS who work for the telephone company do so for many, many years. After working for the company 21 years or more, these folks are eligible to join a fine club—the Telephone Pioneers of America. Today there are almost 200,000 members throughout the United States and Canada. They have a lot of fun at their parties, work hard to promote community undertakings, and find companionship in talking over old times.

When winter weather doesn't permit the trip you planned, why not let Long Distance make it for you? It's quick, easy and economical.

**Ideal** : FOR THE HOME  
: FOR THE CHURCH  
: FOR THE CHAPEL

Organ music is the most relaxing of all music, psychologists maintain. And now, busy professional people who have never played music before are amazed to find they can enjoy themselves at the Hammond Organ.

The Hammond Organ is the most popular and most widely used of any organ in the church and the chapel . . . and the price is so attractive.

Popular, religious, even classical music is played beautifully on the Hammond . . . and it is so easy to learn. Ask us about our Free lesson program.

### OUR RENTAL PLAN

Yes . . . just pennies a day will place a new Hammond Organ in your home, your church or your school. You learn to play as you pay so very little each month . . . then, if you decide to buy, every penny you have paid in rent will be applied to the purchase price. No such plan has ever been offered on the beautiful Hammond Organ.

## Just A Word of Thanks

It was in the year of 1926 when Henry Ford was bidding for the opportunity of operating Wilson Dam and the hopes of the Muscle Shoals Area were high and low with the long drawn out controversy in Congress over this issue, that a few civic-minded business men from both sides of the Tennessee River pooled some capital and organized The Alabama Industrial Bank.

This was the first institution of its kind in this area whose sole purpose was to meet the needs of worthy people with the problem of sudden illness, hospital bills, school or college expense, home improvements, etc., where re-payments could be spread out over a period of small monthly payments. The public's response was so great that within the first year it was necessary to expand our organization by doubling the capital stock, on which basis it has continuously operated over the past 33 years. Our interest rates have been kept at a minimum by our strict economy of operation thereby saving our borrowers thousands of dollars for their benefit.

Over the period of its operation The Alabama Industrial Bank has loaned well over eight million dollars to its patrons all of which has gone into trade channels and contributed to the well-being of the borrower as well as local business.

The Alabama Industrial Bank likes to believe that down through the three decades of operation, it has justified its existence by meeting emergency needs continuously; It further hopes that it has been held in esteem by succeeding generations of patrons and that its faith and confidence have been justified by the record of less than 1% of loss over 33 years of operation.

Our officers and management would like to take this opportunity to express their appreciation for the confidence and cooperation of the citizens of the Muscle Shoals Area over the past years whom we've served and whom we hope to continue to serve. We also cordially invite others to take advantage of our low cost service.

Sincerely yours:

# 3 3/4% INTEREST ON NEW U.S. SAVINGS BONDS NOW IN EFFECT

*Congress makes the Bonds you buy and Bonds you already own better than ever!*

Now U.S. Savings Bonds are a better buy than ever in three important ways:

- All Series E and H Bonds bought since June 1, 1959 now earn 3 3/4% interest when held to maturity.
- Older Bonds will also pay more—an extra 1/2%, from June 1 on, if you hold them to maturity.
- All Series E Bonds, old or new, now carry an automatic extension privilege; they'll keep paying liberal interest for 10 years beyond maturity.

Three big new dollar benefits that make it smart to buy new Bonds—and hang on to the ones you have!

40 million Americans now own Bonds

But a good return isn't the only reason so many people buy Bonds. They've discovered that there's no easier, safer, more American way to save.

You can buy Bonds automatically, through the Payroll Savings Plan where you work; you can buy them where you

bank; your youngsters can even buy them at school, through the School Savings Plan for U.S. Savings Stamps.

The U.S. Government guarantees that the cash value of your Bonds cannot drop; it can only grow. And if your Bonds should be lost, stolen, or destroyed, the Treasury will replace them free.

Finally, every Bond you buy does a big job for America. Because today peace costs money—money for military strength and for science; and money saved by individuals to keep our economy sound.

Your Bonds help provide this money—help America keep the peace. So, to build a brighter future for yourself and your family—and to protect it—save with U.S. Savings Bonds. They're better than ever.

**YOUR MONEY GROWS 3 3/4% IN JUST 7 YEARS AND 9 MONTHS WITH NEW SERIES E BONDS!**
